Open Access as Promotion: ScholarlyCommons at the Penn Libraries

Roch Guevara
Alfred H. Mellers Professor of Electronic Communications and Networking
Electrical and Systems Engineering (ESE)
Computer and Information Science (CIS)

Honors and Awards:
IEEE INFOCOM Achievement Award - 2014; IEEE INFOCOM Best Paper Award - 2008, 2009; Fulbright Scholar Award - 2005; EEE Meritorious Service Award - 2002.

Research Experiences:
Computer Networks

Guevara focuses on packet over optical experimental communication systems. He works in large-scale, high-volume, and diverse traffic networks, using data from a variety of sources. This research is part of a larger area of computer networking and communication systems. The main goal of this work is to understand how the network infrastructure can be used to support both virtual and real-time services.

Affiliations:
- University of Michigan
- California Institute of Technology
- Georgia Institute of Technology
- University of Pennsylvania

Our Contributions in Research:
The University of Pennsylvania is committed to the advancement of knowledge and the contribution of its faculty to society. Faculty members are encouraged to engage in research and scholarship that will lead to the development of new knowledge and understanding. Faculty members are also encouraged to collaborate with students, fellow faculty members, and other researchers in the pursuit of knowledge. Faculty members are expected to engage in research and scholarship that will lead to the development of new knowledge and understanding. Faculty members are also encouraged to collaborate with students, fellow faculty members, and other researchers in the pursuit of knowledge.
